

AiNET® Datacenter & Colocation

Complete Tier-IV Datacenter, Disaster Recovery and Business Continuity Services

Our Infrastructure. Your Data.
Trusted. Secure.

Datacenter needs are growing: Applications are growing more resource intensive; regulatory compliance, more complex. Costs are skyrocketing while budgets are under increasing pressure.

Next generation systems including Cloud Computing and Storage Area Networks (SAN) are stressing power & cooling densities and datacenter designs. There is a need for increased vigilance from natural disasters and man-made threats.

In today's time, the Enterprise Datacenter is the nervous system and life blood of the organization. Downtime is expensive and devastating to your brand and your core business.

AiNET® is your premier partner to manage the growth and operations of your Enterprise Datacenter.

Datacenter & Colocation Services: AiNET® builds, operates and manages certified Tier IV datacenter facilities to clients who choose to outsource their technology requirements. We can deliver both secure and non-secure facilities from thousands of square feet of data center to partial rack-space. All facilities have personnel on-site *24x7xForever* and are protected by electronic key card, infra-red video surveillance and biometric security measures. Datacenter sites are typically used for services such as Web Hosting, Application Hosting, Continuance of Operations (COOP), Colocation or Disaster Recovery.

Benefits and Features:

- Standard Compliant and Compliance assistance - FISMA, HIPAA, SOX, PCI, SAS-70, NIST Cloud
- Minimize growth of Data Centers. Maximize existing resources. Reduced IT overhead.
- Minimize training new personnel or licensing new software.
- Highly-efficient Green facilities
- Over 50,000 sq ft Tier IV data center space owned and operated in multiple locations.
- Dedicated Security team and Network Operations Center (NOC) staffed *24/7/Forever*.
- Fault Tolerant, Reliable, and Secure Infrastructure.

Call or write today for a complete no-cost analysis of your needs.

AiNET® Datacenter Services – (datacenter@ai.net) – 888-3AiNET3 – www.ai.net

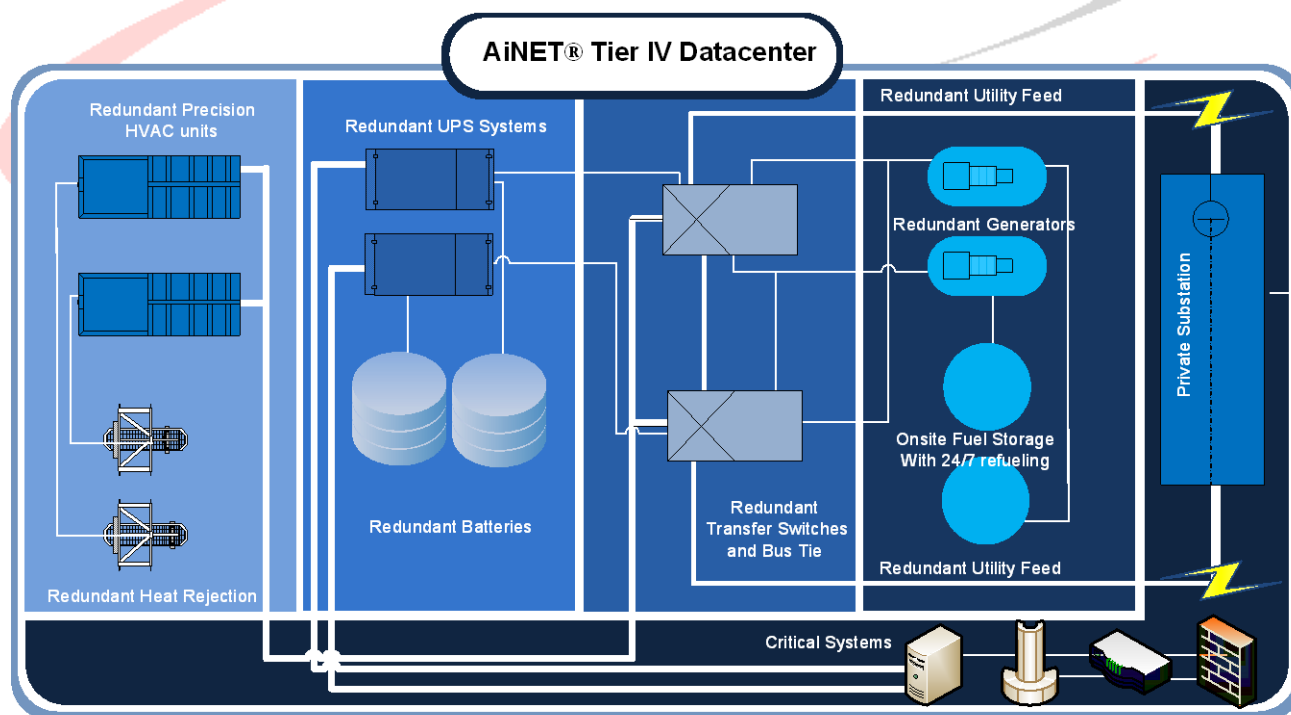

- Ready Scalability - Cloud-Ready
- True Quality of service guarantees – 100% Availability SLA with monetary penalties.
- Integrated Carrier-Neutral Network & Datacenter packages
- Certified Tier IV facilities with a minimum of N+1 power, cooling and connectivity.
- 24x7xForever on-site support.
- 24x7xForever biometric and physical security.
- Lowered Total Cost of Ownership (TCO).

Our Infrastructure. Your Data.
Trusted. Secure.

Our Strength Is Your Solution:

- AiNET® owns its own data centers, including the ground they sit on. No leases. No intermediaries.
- AiNET® owns its own DWDM network including the actual physical fiber, manholes and routers.
- AiNET® professional staff are recognized leaders in their areas of expertise including computer security, network security/operations and data center design/operations.
- AiNET® services its own data centers and networks. Our staff provides network operations, facility management, renovations, etc.
