

Who is AiNET®?

AiNET® is a recognized leader in high technology solutions requiring mission critical IT infrastructure coupled with best-in-class industry support. Founded in 1993 and privately held, AiNET provides wide-area connectivity, specialized technology platforms for complex application hosting and data center outsourcing for commercial, education and government enterprises.

Our Infrastructure. Your Data.
Trusted. Secure.

AiNET® Infrastructure supports these services:

Cloud Computing and Storage Services: AiNET® provides clients with a defined set of proactive technology services on an as-needed basis. We provide the hands-on administration that you need, saving you time and money. Managed service agreements provide customers with a cost effective method of outsourcing their IT needs.

Datacenter Services: AiNET® builds, operates and manages certified Tier IV datacenter facilities to clients who choose to outsource their technology requirements. We can deliver both secure and non-secure facilities from thousands of square feet of data center to partial rack-space. All facilities have personnel on-site *24x7xForever* and are protected by electronic key card, infra-red video surveillance and biometric security measures. Datacenter sites are typically used for services such as Web Hosting, Application Hosting, Continuation of Operations (COOP) or Disaster Recovery.

Network and Internet Service Provider (NSP/ISP): AiNET® is a full service Tier 1 network service provider with the ability to deliver IP, Transport and fiber waves in both a secure and non-secure environment.

Network Operations Center (NOC): *24x7xForever* staffed operations center providing monitoring, pro-active fault detection and resolution. Certified systems and network engineers work directly with Customer systems and personnel.

AiNET® is trusted by Verizon Business, Dean Foods, Merkle, Re/Max, Millenium Bank, Georgetown University and Lockheed Martin. *We want to earn your trust.*

Call or write today for a facility tour, we are worth your visit

AiNET® Differentiators:

Our Infrastructure:

- Certified Tier IV facilities with a minimum of N+1 power, cooling and connectivity.
- *24x7xForever* on-site support.
- *24x7xForever* biometric and physical security.
- Reallocation of human assets to their primary responsibilities.
- Lowered Total Cost of Ownership (TCO).

Our Infrastructure. Your Data.
Trusted. Secure.

Our Strength:

- Fortune 100 Client Base.
- Founded in 1993.
- Profitable Private Entity with no debt.
- AiNET® owns its own data centers, including the ground they sit on. No leases. No intermediaries.
- AiNET® owns its own DWDM network including the actual physical fiber, manholes and routers.
- AiNET® professional staff are recognized leaders in their areas of expertise including computer security, network security/operations and data center design/operations.
- AiNET® services its own data centers and networks. Our staff provides network operations, facility management, renovations, etc.

Your Results:

- Fewer Subcontractors, Higher Reliability.
- More Responsibility, Better Coordination.
- *One phone call to support it all!*

These differentiators allow AiNET® to offer state-of-the-art services quickly and cost-effectively that are more reliable and transparent. Performance is auditable, measurable and consistent. Application data is trusted and secure. *We want to earn your trust.*
