

AiNET® Total Mail Solution

Complete Email Security and Assurance

Our Infrastructure. Your Data.
Trusted. Secure.

Enterprise Email management has become a complex application for any organization due to increasing compliance regulations for security, retention and e-discovery. Mitigating the threat of virus infiltration and the onslaught of unsolicited spam mail has become a daunting challenge. Homogeneity of access methods and security from corporate desktop to wireless road warrior between all organizations is almost impossible in today's environment. *Until now.*

The AiNET® Total Mail CloudStack consists of multiple layers of service:

- Integrated Firewall
- Integrated Spam Filter
- Integrated Virus Filter
- Microsoft Outlook
- Microsoft Outlook Web Access
- Integrated 256-bit SSL Security
- Blackberry Enterprise Server (BES)
- Microsoft Exchange Server with ActiveSync
- All feature, security and software updates automatically
- All computation, bandwidth and storage resources to meet your needs
- Pay per seat, no capital expense

Benefits and Features:

- Integrated solution offering seamless contact, scheduling and calendaring across the Enterprise
- Seamless data security from the corporate desktop to the wireless smart phone
- Activesync and BES offer instantaneous synchronization with Enterprise systems to wireless units. (Blackberry, iPhone and others).
- Flexible feature sets: add functions like email retention, e-discovery, other compliance needs
- On-demand self-service to allow 20 to 20,000 users overnight to meet peak periods or urgent demands. Turn license and infrastructure fixed costs to variable
- Standard Compliant and Compliance assistance - FISMA, HIPPA, SOX, PCI, SAS-70, NIST Cloud
- Minimize growth of Data Centers. Maximize existing resources. Reduced IT overhead.
- Minimize training new personnel or licensing new software.
- Automated replication and backup
- Data encryption at rest and in transit.

Call or write today for a complete no-cost analysis of your needs.
